Ankur Textiles that manufactures Cotton and Blended Voiles product category continues its leadership in the domestic market. An end product for the Indian Blouse, the company caters to all the market segments offering a huge range of products giving the company a sharp competitive edge. The company also has its presence in the Swiss, Middle-East, and Srilankan markets to which it caters fine two ply plain as well as fancy cotton voiles for Guthras and Emmas (head gears for men), Thobes (a product similar to Indian Sarees for women) and the Rubia Voile. Other prominent products include cotton and blended shirting, long cloth, sarees, dress materials, lawns and a wide range of structured fabrics.

With such a unique focus in Voiles, the company enjoys an unprecedented leadership in the 2x2 Rubia segment, with a major 40% market share, a market estimated to be 25 million metres / annum. The company's chief strength is its amazingly rich and fancy colour palette. In a business where shades reign supreme, the voile division boasts of its incredibly large shade collection – offering perfect blend for diverse tastes, each bearing the same stamp of quality and excellence.

With an impressive countrywide distribution network comprising of almost 150 dealers, the company has an unprecedented reach and deeper penetration into hitherto unexplored markets. The company has always gained a huge applause for its customers service, product quality and on time deliveries, some of the key aspects, which have helped the company sustain its growth and performance over the past few years.

With the changing fashion trends and the dressing patterns, the company has taken a conscious decision to make headway into the fabric supplies to such garment converters where quality and service requirements are superlative and production runs are relatively small. To cater to this segment, required capacity expansion and upgradation completed in the processing department and is likely to reap higher turnover and further strengthen its market presence in the coming years.

Product Group - Bottomweights

Performance of Bottomweight fabric division had been satisfactory. Capacity utilization increase and volume went up from 13.3 million meters in previous year to 16.8 million meters in the current year. Export volume picked up particularly in US.

Margins are under pressure with cotton prices and yarn prices are at very high level and the same are not been absorbed in the export market.

The Company has started various new initiatives to mitigate the margin pressure. The Company has been able to successfully produce the Fire retardant fabric and have invested aggressively in the best technology so as to produce the International standard Fire retardant fabric. The Company is mitigating the cotton dependency through usage of different fibre like viscose/modal etc. which would enhance our product portfolio and would protect the company from high fluctuation in cotton market. The Company is also increasing presence in the Retail market through aggressive marketing in suiting segment which holds a huge potential of tapping the Indian market and in turn improve order visibility.

Going forward we would be able to maintain the volume, however with appreciating rupee and recession prevailing in most of the developed market, the margins would continue to be under pressure. However the new initiatives and continuous cost rationalization initiative would help to sustain the margin.

The Company has well defined and institutionalised business processes with effective control systems to ensure that assets and interests of the company are safeguarded.

The Company has a dedicated task force working on budgetary controls, responsible for preparation of the budget, which is reviewed along with the performance on monthly basis and corrective actions, wherever needed to ensure compliance.
